

MONTHLY REPORT!

The official Newsletter of the first part of the Associative Year

What's in this newsletter:

- **SIDI WEBINAR**
- **ITALIAN NATIONAL SPACE DAY**

Merry Christmas and Happy New Year, fellow EUROAVIANS!
 Hoping you are enjoying this holiday season, this year was particularly difficult for all of us, but we managed to get through it! Cheers to us!

We, as EUROAVIA Napoli, started this month of December with a thrilling event: last month, as you may recall, all three Italian AS established a new partnership with **SIDI**, the Swiss Institute of Disruptive Innovations. We had the pleasure to host a **webinar** with some of their experts from the School of Disruption and our President: they put in plain words their purpose and what experiences and opportunities they could offer to our members. It was just inspiring and exciting, it made us think about all the possibilities we have and how far you could go if you're willing to take the risk to follow your dreams!

With a directive of the Council of Ministers, here in Italy, the 16th of December was declared the **National Space Day**, in order to celebrate the launch of the first Italian satellite, *San Marco 1*, which took place in 1964, thanks to which Italy was among the first countries in the world to overcome the Earth's atmosphere. Of course, our team of EUROAVIA Napoli did its best to celebrate this recurrence, the first of many!

Spazio, Innovazione e Futuro

Una Giornata al **CIRA**

Giornata Nazionale dello Spazio

16 Dicembre

- Giovedì 16 Dicembre
alle 9:30
- Conferenza e visita
tecnica al Centro Italiano
Ricerche Aerospaziali
- Collegamento con l'ASI

The **CIRA**, *Italian Aerospace Research Centre*, held an astounding event in their establishment called "Spazio, Innovazione e Futuro" which we were lucky enough to attend with some of our members. This gathering included a presentation of the latest projects and innovative technologies regarding space exploration and the intervention of many leading figures of the Italian Aerospace sector, both physically and remotely. We had the extraordinary chance to listen to Italian Astronauts, Scientists, and Researchers, and at the end of the day, we also visited CIRA's laboratories!

But that is not all: to continue with the celebrations, we were invited to Naples' **Città della Scienza** (*City of Science*) to listen to a wondrous conference regarding Italian milestones and achievements in Space Exploration, from the launch of *San Marco 1* until today - all hosted inside their Planetarium!

And that is all for this year, here's to another one full of exciting opportunities! May your holidays be full of warmth and cheer!

Until next time (and next year),

EUROAVIA Napoli

*Build
the wings
of your
future*
